

Control Domain	Control ID	Question ID	Control Specification	Consensus Assessment Questions	Consensus Assessment Answers			Notes
					Yes	No	Not Applicable	
Application & Interface Security Application Security	AIS-01	AIS-01.1	Applications and programming interfaces (APIs) shall be designed, developed, deployed, and tested in accordance with leading industry standards (e.g., OWASP for web applications) and adhere to applicable legal, statutory, or regulatory compliance obligations.	Do you use industry standards (i.e. OWASP Software Assurance Maturity Model, ISO 27034) to build in security for your Systems/Software Development Lifecycle (SDLC)?	x			Euroinformatica has ISO 9001 certification for all that refers to Quality. Moreover it has internal procedures to respect common best practices in SDLC.
		AIS-01.2		Do you use an automated source code analysis tool to detect security defects in code prior to production?	x			Developers use automatic tools for error detection about grammar, syntax and semantics, included in the framework used for development (IDE). Moreover, in SDLC phases there's the code's review operated by developers.
		AIS-01.3		Do you use manual source-code analysis to detect security defects in code prior to production?	x			
		AIS-01.4		Do you verify that all of your software suppliers adhere to industry standards for Systems/Software Development Lifecycle (SDLC) security?			x	We don't use external software suppliers.
		AIS-01.5		(SaaS only) Do you review your applications for security vulnerabilities and address any issues prior to deployment to production?	x			
Application & Interface Security Customer Access Requirements	AIS-02	AIS-02.1	Prior to granting customers access to data, assets, and information systems, identified security, contractual, and regulatory requirements for customer access shall be addressed.	Are all identified security, contractual, and regulatory requirements for customer access contractually addressed and remediated prior to granting customers access to data, assets, and information systems?	x			Terms of use of SaaS service are always clear. In the contracts it is written that Euroinformatica complies with the General Data Protection Regulation (GDPR). Furthermore, we invite the customer to appoint Euroinformatica as external manager for data processing (also sending the forms to be used). As for the credentials on Atlantide, they expire every three months and access is blocked beyond the third failed attempt.
		AIS-02.2		Are all requirements and trust levels for customers' access defined and documented?	x			
Application & Interface Security Data Integrity	AIS-03	AIS-03.1 AIS-03.2	Data input and output integrity routines (i.e., reconciliation and edit checks) shall be implemented for application interfaces and databases to prevent manual or systematic processing errors or corruption of data.	Does your data management policies and procedures require audits to verify data input and output integrity routines? Are data input and output integrity routines (i.e. MD5/SHA checksums) implemented for application interfaces and databases to prevent manual or systematic processing errors or corruption of data?	x x			
Application & Interface Security Data Security / Integrity	AIS-04	AIS-04.1	Policies and procedures shall be established and maintained in support of data security to include (confidentiality, integrity, and availability) across multiple system interfaces, jurisdictions, and business functions to prevent improper disclosure, alteration, or destruction.	Is your Data Security Architecture designed using an industry standard (e.g., CDSA, MULTISAFE, CSA Trusted Cloud Architectural Standard, FedRAMP, CAESARS)?	x			Euroinformatica has ISO 9001 certification; it complies with the General Data Protection Regulation (GDPR) and we have organized data security at the design level (privacy by design).
Audit Assurance & Compliance Audit Planning	AAC-01	AAC-01.1	Audit plans shall be developed and maintained to address business process disruptions. Auditing plans shall focus on reviewing the effectiveness of the implementation of security operations. All audit	Do you develop and maintain an agreed upon audit plan (e.g., scope, objective, frequency, resources etc.) for reviewing the efficiency and effectiveness of implemented security controls?	x			
		AAC-01.2		Does your audit program take into account effectiveness of implementation of security operations?	x			
Audit Assurance & Compliance Independent Audits	AAC-02	AAC-02.1	Independent reviews and assessments shall be performed at least annually to ensure that the organization addresses nonconformities of established policies, standards, procedures, and compliance obligations.	Do you allow tenants to view your SOC2/ISO 27001 or similar third-party audit or certification reports?	x			On customer's request, we can provide a similar report based on ISO 9001.
		AAC-02.2		Do you conduct network penetration tests of your cloud service infrastructure at least annually?	x			
		AAC-02.3		Do you conduct application penetration tests of your cloud infrastructure regularly as prescribed by industry best practices and guidance?	x			
		AAC-02.4		Do you conduct internal audits at least annually?	x			
		AAC-02.5		Do you conduct independent audits at least annually?	x			About ISO 9001, we are supported by an external consultant.
		AAC-02.6		Are the results of the penetration tests available to tenants at their request?	x			On customer's request, we can provide the summary of the penetration tests.
		AAC-02.7		Are the results of internal and external audits available to tenants at their request?	x			On customer's request, we can provide the summary of the penetration tests.
Audit Assurance & Compliance Information System Regulatory Mapping	AAC-03	AAC-03.1	Organizations shall create and maintain a control framework which captures standards, regulatory, legal, and statutory requirements relevant for their business needs. The control framework shall be reviewed at least annually to ensure changes that could affect the business processes are reflected.	Do you have a program in place that includes the ability to monitor changes to the regulatory requirements in relevant jurisdictions, adjust your security program for changes to legal requirements, and ensure compliance with relevant regulatory requirements?	x			Euroinformatica guarantees compliance with Italian and European laws regarding stipulated contracts; the data center is placed in Italy.
Business Continuity Management & Operational Resilience Business Continuity Planning	BCR-01	BCR-01.1	A consistent unified framework for business continuity planning and plan development shall be established, documented, and adopted to ensure all business continuity plans are consistent in addressing requirements for testing, maintenance, and information security requirements. Requirements for business continuity plans include the following: • Defined purpose and scope, aligned with relevant dependencies • Accessible to and understood by those who will use	Does your organization have a plan or framework for business continuity management or disaster recovery management?	x			
		BCR-01.2		Do you have more than one provider for each service you depend on?		x		
		BCR-01.3		Do you provide a disaster recovery capability?	x			
		BCR-01.4		Do you monitor service continuity with upstream providers in the event of provider failure?		x		
		BCR-01.5		Do you provide access to operational redundancy reports, including the services you rely on?		x		
		BCR-01.6		Do you provide a tenant-triggered failover option?		x		
		BCR-01.7		Do you share your business continuity and redundancy plans with your tenants?		x		
Business Continuity Management & Operational Resilience Business Continuity Testing	BCR-02	BCR-02.1	Business continuity and security incident response plans shall be subject to testing at planned intervals or upon significant organizational or environmental changes. Incident response plans shall involve impacted customers (tenant) and other business relationships that represent critical intra-supply chain business process dependencies.	Are business continuity plans subject to testing at planned intervals or upon significant organizational or environmental changes to ensure continuing effectiveness?		x		
Business Continuity Management & Operational Resilience Power / Business Continuity Management & Operational Resilience Documentation	BCR-03	BCR-03.1	Data center utilities services and environmental conditions (e.g., water, power, temperature and humidity controls, telecommunications, and internet connectivity) shall be secured, monitored, maintained and tested for continual effectiveness at planned intervals.	Does your organization adhere to any international or industry standards when it comes to securing, monitoring, maintaining and testing of datacenter utilities services and environmental conditions?			x	In partnership with qualified CSP where the application platform is hosted
		BCR-03.2		Has your organization implemented environmental controls, fail-over mechanisms or other redundancies to secure utility services and mitigate environmental conditions?			x	In partnership with qualified CSP where the application platform is hosted
Business Continuity Management & Operational Resilience Documentation	BCR-04	BCR-04.1	Information system documentation (e.g., administrator and user guides, and architecture diagrams) shall be made available to authorized personnel to ensure the following: • Configuring, installing, and operating the information system • Effectively using the system's security features.	Are information system documents (e.g., administrator and user guides, architecture diagrams, etc.) made available to authorized personnel to ensure configuration, installation and operation of the information system?	x			
Business Continuity Management & Operational Resilience Environmental Risks	BCR-05	BCR-05.1	Physical protection against damage from natural causes and disasters, as well as deliberate attacks, including fire, flood, atmospheric electrical discharge, solar induced geomagnetic storm, wind, earthquake, tsunami, explosion, nuclear accident, volcanic activity, biological hazard, civil unrest, mudslide, tectonic activity, and other forms of natural or man-made disaster shall be anticipated, designed, and have countermeasures applied.	Is physical damage anticipated and are countermeasures included in the design of physical protections?	x			
Business Continuity Management & Operational Resilience Equipment Location	BCR-06	BCR-06.1	To reduce the risks from environmental threats, hazards, and opportunities for unauthorized access, equipment shall be kept away from locations subject to high probability environmental risks and supplemented by redundant equipment located at a reasonable distance.	Are any of your data centers located in places that have a high probability/occurrence of high-impact environmental risks (floods, tornadoes, earthquakes, hurricanes, etc.)?		x		
Business Continuity Management & Operational Resilience Equipment Power Failures	BCR-07	BCR-07.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, for equipment maintenance ensuring continuity and availability of operations and support personnel.	Do you have documented policies, procedures and supporting business processes for equipment and datacenter maintenance?			x	In partnership with qualified CSP where the application platform is hosted
		BCR-07.2		Do you have an equipment and datacenter maintenance routine or plan?			x	In partnership with qualified CSP where the application platform is hosted
Business Continuity Management & Operational Resilience Impact Analysis	BCR-08	BCR-08.1	Protection measures shall be put into place to react to natural and man-made threats based upon a geographically-specific business impact assessment.	Are security mechanisms and redundancies implemented to protect equipment from utility service outages (e.g., power failures, network disruptions, etc.)?			x	In partnership with qualified CSP where the application platform is hosted
Business Continuity Management & Operational Resilience Retention Policy	BCR-09	BCR-09.1	There shall be a defined and documented method for determining the impact of any disruption to the organization (cloud provider, cloud consumer) that must incorporate the following: • Identify critical products and services	Do you use industry standards and frameworks to determine the impact of any disruption to your organization (i.e. criticality of services and recovery priorities, disruption tolerance, RPO and RTO etc) ?	x			
		BCR-09.2		Does your organization conduct impact analysis pertaining to possible disruptions to the cloud service?	x			
Business Continuity Management & Operational Resilience Policy	BCR-10	BCR-10.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, for appropriate IT governance and service management to ensure appropriate planning, delivery and support of the organization's IT capabilities supporting business functions, workforce, and/or customers based on industry acceptable standards (i.e., ITIL v4 and COBIT 5). Additionally, policies and procedures shall include defined roles and responsibilities supported by	Are policies and procedures established and made available for all personnel to adequately support services operations' roles?	x			
Business Continuity Management & Operational Resilience Retention Policy	BCR-11	BCR-11.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, for defining and adhering to the retention period of any critical asset as per established policies and procedures, as well as applicable legal, statutory, or regulatory compliance obligations. Backup and recovery measures shall be incorporated as part of business continuity planning and tested accordingly for effectiveness.	Do you have technical capabilities to enforce tenant data retention policies?	x			
		BCR-11.2		Do you have documented policies and procedures demonstrating adherence to data retention periods as per legal, statutory or regulatory compliance requirements?	x			
		BCR-11.3		Have you implemented backup or recovery mechanisms to ensure compliance with regulatory, statutory, contractual or business requirements?	x			
		BCR-11.4		If using virtual infrastructure, does your cloud solution include independent hardware restore and recovery capabilities?	x			In partnership with qualified CSP where the application platform is hosted
		BCR-11.5		If using virtual infrastructure, do you provide tenants with a capability to restore a virtual machine to a previous configuration?			x	We provide a SaaS service, so tenants have not direct access.
		BCR-11.6		Does your cloud solution include software/provider independent restore and recovery capabilities?	x			
		BCR-11.7		Do you test your backup or redundancy mechanisms at least annually?			x	
Change Control & Configuration Management New Development / Acquisition	CCC-01	CCC-01.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to ensure the development and/or acquisition of new data, physical or virtual applications, infrastructure network and systems components, or any corporate, operations and/or data center facilities have been pre-authorized by the organization's business leadership or other accountable business role or function.	Are policies and procedures established for management authorization for development or acquisition of new applications, systems, databases, infrastructure, services, operations and facilities?	x			
Change Control & Configuration Management	CCC-02	CCC-02.1	External business partners shall adhere to the same policies and procedures for change management.	Are policies and procedures for change management, release, and testing adequately communicated to external business partners?			x	We don't have external business partners.

Management Outsourced		CCC-02.2	release, and testing as internal developers within the organization (e.g., ITIL service management)	Are policies and procedures adequately enforced to ensure external business partners comply with change management requirements?			x	We don't have external business partners.	
Change Control & Configuration Management Quality Testing	CCC-03	CCC-03.1	Organizations shall follow a defined quality change control and testing process (e.g., ITIL Service Management) with established baselines, testing, and release standards which focus on system availability, confidentiality, and integrity of systems and services.	Do you have a defined quality change control and testing process in place based on system availability, confidentiality, and integrity?			x		
		CCC-03.2		Is documentation describing known issues with certain products/services available?	x				
		CCC-03.3		Are there policies and procedures in place to triage and remedy reported bugs and security vulnerabilities for product and service offerings?	x				
		CCC-03.4		Do you have controls in place to ensure that standards of quality are being met for all software development?			x		
		CCC-03.5		Do you have controls in place to detect source code security defects for any outsourced software development activities?				x	We don't have outsourced software.
		CCC-03.6		Are mechanisms in place to ensure that all debugging and test code elements are removed from released software versions?	x				
Change Control & Configuration Management Unauthorized Software Installations	CCC-04	CCC-04.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to restrict the installation of unauthorized software on organizationally-owned or managed user end-point devices (e.g., issued workstations, laptops, and mobile devices) and IT infrastructure network and systems components.	Do you have controls in place to restrict and monitor the installation of unauthorized software onto your systems?	x				
Change Control & Configuration Management Production Changes	CCC-05	CCC-05.1	Policies and procedures shall be established for managing the risks associated with applying changes to:	Do you provide tenants with documentation that describes your production change management procedures and their roles/responsibilities within it?	x			On customer's request, usually by signing a non-disclosure agreement.	
		CCC-05.2	• Business-critical or customer (tenant)-impacting (physical and virtual) applications and system-system interface (API) designs and configurations.	Do you have policies and procedures established for managing risks with respect to change management in production environments?	x				
		CCC-05.3	• Infrastructure network and systems components. Technical measures shall be implemented to provide	Do you have technical measures in place to ensure that changes in production environments are registered, authorized and in adherence with existing SLAs?	x				
Data Security & Information Lifecycle Management Classification	DSI-01	DSI-01.1	Data and objects containing data shall be assigned a classification by the data owner based on data type, value, sensitivity, and criticality to the organization.	Do you provide a capability to identify data and virtual machines via policy tags/metadata (e.g., tags can be used to limit guest operating systems from booting/instantiating/transporting data in the wrong country)?			x		
		DSI-01.2		Do you provide a capability to identify data and hardware via policy tags/metadata/hardware tags (e.g., TXT/TPM, VN-Tag, etc.)?			x		
Data Security & Information Lifecycle Management Data Inventory / Flows	DSI-02	DSI-02.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to inventory, document, and maintain data flows for data that is resident (permanently or temporarily) within the service's	Do you inventory, document, and maintain data flows for data that is resident (permanent or temporary) within the services' applications and infrastructure network and systems?	x				
		DSI-02.2	permanently or temporarily) within the service's	Can you ensure that data does not migrate beyond a defined geographical residency?	x				
Data Security & Information Lifecycle Management E-commerce Transactions	DSI-03	DSI-03.1	Data related to electronic commerce (e-commerce) that traverses public networks shall be appropriately classified and protected from fraudulent activity, unauthorized disclosure, or modification in such a manner to prevent contract dispute and compromise of data.	Do you provide standardized (e.g. ISO/IEC) non-proprietary encryption algorithms (3DES, AES, etc.) to tenants in order for them to protect their data if it is required to move through public networks (e.g., the Internet)?			x		
		DSI-03.2		Do you utilize open encryption methodologies any time your infrastructure components need to communicate with each other via public networks (e.g., Internet-based replication of data from one environment to another)?				x	
Data Security & Information Lifecycle Management Handling / Labeling / Security Policy	DSI-04	DSI-04.1	Policies and procedures shall be established for labeling, handling, and the security of data and objects which contain data. Mechanisms for label inheritance shall be implemented for objects that act as aggregate containers for data.	Are policies and procedures established for data labeling and handling in order to ensure the security of data and objects that contain data?			x		
		DSI-04.2		Do you follow a structured data-labeling standard (e.g., ISO 15489, Oasis XML Catalog Specification, CSA data type guidance)?			x		
		DSI-04.3		Are mechanisms for label inheritance implemented for objects that act as aggregate containers for data?			x		
Data Security & Information Lifecycle Management Nonproduction Data	DSI-05	DSI-05.1	Production data shall not be replicated or used in non-production environments. Any use of customer data in non-production environments requires explicit, documented approval from all customers whose data is affected, and must comply with all legal and regulatory requirements for scrubbing of sensitive data elements.	Do you have procedures in place to ensure production data shall not be replicated or used in non-production environments?			x		
Data Security & Information Lifecycle Management Ownership / Stewardship	DSI-06	DSI-06.1	All data shall be designated with stewardship, with assigned responsibilities defined, documented, and communicated.	Are the responsibilities regarding data stewardship defined, assigned, documented, and communicated?	x				
Data Security & Information Lifecycle Management Secure Disposal	DSI-07	DSI-07.1	Policies and procedures shall be established with supporting business processes and technical measures implemented for the secure disposal and complete removal of data from all storage media, ensuring data is not recoverable by any computer	Do you support the secure deletion (e.g., degaussing/cryptographic wiping) of archived and backed-up data?			x		
		DSI-07.2		Can you provide a published procedure for exiting the service arrangement, including assurance to sanitize all computing resources of tenant data once a customer has exited your environment or has vacated a resource?			x		
Datacenter Security Asset Management	DCS-01	DCS-01.1	Assets must be classified in terms of business criticality, service-level expectations, and operational continuity requirements. A complete inventory of business-critical assets located at all sites and/or geographical locations and their usage over time shall	Do you classify your assets in terms of business criticality, service-level expectations, and operational continuity requirements?	x				
		DCS-01.2		Do you maintain a complete inventory of all of your critical assets located at all sites/ or geographical locations and their assigned ownership?	x			Application platform is hosted on qualified CSP.	
Datacenter Security Controlled Access Points	DCS-02	DCS-02.1	Physical security perimeters (e.g., fences, walls, barriers, guards, gates, electronic surveillance, physical authentication mechanisms, reception desks, and security patrols) shall be implemented to safeguard sensitive data and information systems.	Are physical security perimeters (e.g., fences, walls, barriers, guards, gates, electronic surveillance, physical authentication mechanisms, reception desks, and security patrols) implemented for all areas housing sensitive data and information systems?	x			Activities listed are in partnership with the qualified CSP (Vodafone Global Data Center).	
Datacenter Security Equipment Identification	DCS-03	DCS-03.1	Automated equipment identification shall be used as a method of connection authentication. Location-aware technologies may be used to validate connection authentication integrity based on known equipment	Do you have a capability to use system geographic location as an authentication factor?			x		
		DCS-03.2		Is automated equipment identification used as a method to validate connection authentication integrity based on known equipment location?	x				
Datacenter Security Offsite Authorization	DCS-04	DCS-04.1	Authorization must be obtained prior to relocation or transfer of hardware, software, or data to an offsite premises.	Is authorization obtained prior to relocation or transfer of hardware, software, or data to an offsite premises?	x				
Datacenter Security Offsite Equipment	DCS-05	DCS-05.1	Policies and procedures shall be established for the secure disposal of equipment (by asset type) used outside the organization's premise. This shall include a wiping solution or destruction process that renders recovery of information impossible. The erasure shall consist of a full write of the drive to ensure that the erased drive is released to inventory for reuse and deployment or securely stored until it can be	Can you provide tenants with your asset management policies and procedures?	x			Application platform is hosted on qualified CSP. Activities listed are in partnership with the qualified CSP (Vodafone Global Data Center).	
Datacenter Security Policy	DCS-06	DCS-06.1	Policies and procedures shall be established, and supporting business processes implemented, for maintaining a safe and secure working environment in offices, rooms, facilities, and secure areas storing sensitive information.	Can you provide evidence that policies, standards, and procedures have been established for maintaining a safe and secure working environment in offices, rooms, facilities, and secure areas?	x				
		DCS-06.2		Can you provide evidence that your personnel and involved third parties have been trained regarding your documented policies, standards, and procedures?	x				
Datacenter Security Secure Area Authorization	DCS-07	DCS-07.1	Ingress and egress to secure areas shall be constrained and monitored by physical access control mechanisms to ensure that only authorized personnel are allowed access.	Are physical access control mechanisms (e.g. CCTV cameras, ID cards, checkpoints) in place to secure, constrain and monitor egress and ingress points?			x	Application platform is hosted on qualified CSP	
Datacenter Security Unauthorized Persons Entry	DCS-08	DCS-08.1	Ingress and egress points such as service areas and other points where unauthorized personnel may enter the premises shall be monitored, controlled and, if possible, isolated from data storage and processing facilities to prevent unauthorized data corruption, compromise and loss.	Are ingress and egress points, such as service areas and other points where unauthorized personnel may enter the premises, monitored, controlled and isolated from data storage and process?	x			Application platform is hosted on qualified CSP. Activities listed are in partnership with the qualified CSP (Vodafone Global Data Center).	
Datacenter Security User Access	DCS-09	DCS-09.1	Physical access to information assets and functions by users and support personnel shall be restricted.	Do you restrict physical access to information assets and functions by users and support personnel?	x				
Encryption & Key Management Entitlement	EKM-01	EKM-01.1	Keys must have identifiable owners (binding keys to identities) and there shall be key management policies.	Do you have key management policies binding keys to identifiable owners?			x		
		EKM-02.1	Policies and procedures shall be established for the management of cryptographic keys in the service's cryptosystem (e.g., lifecycle management from key generation to revocation and replacement, public key infrastructure, cryptographic protocol design and algorithms used, access controls in place for secure key generation, and exchange and storage including segregation of keys used for encrypted data or sessions). Upon request, provider shall inform the customer (tenant) of changes within the	Do you have a capability to allow creation of unique encryption keys per tenant?			x		
		EKM-02.2		Do you have a capability to manage encryption keys on behalf of tenants?			x		data in transit are encrypted (TLS 1.3)
		EKM-02.3		Do you maintain key management procedures?			x		
		EKM-02.4		Do you have documented ownership for each stage of the lifecycle of encryption keys?			x		
EKM-02.5		Do you utilize any third party/open source/proprietary frameworks to manage encryption keys?			x				
Encryption & Key Management Encryption	EKM-03	EKM-03.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, for the use of encryption protocols for protection of sensitive data in storage (e.g., file servers, databases, and end-user	Do you encrypt tenant data at rest (on disk/storage) within your environment?	x			on customer's request	
		EKM-03.2		Do you leverage encryption to protect data and virtual machine images during transport across and between networks and hypervisor instances?	x			If necessary, virtual machines are encrypted during transport	
		EKM-03.3		Do you have documentation establishing and defining your encryption management policies, procedures, and guidelines?			x		documentation must be updated
Encryption & Key Management Storage and Access	EKM-04	EKM-04.1	Platform and data appropriate encryption (e.g., AES-256) in open/validated formats and standard algorithms shall be required. Keys shall not be stored in the cloud (i.e. at the cloud provider in question), but maintained by the cloud consumer or trusted key management provider. Key management and key usage shall be separated duties	Do you have platform and data appropriate encryption that uses open/validated formats and standard algorithms?			x		
		EKM-04.2		Are your encryption keys maintained by the cloud consumer or a trusted key management provider?			x		data in transit are encrypted (TLS 1.3)
		EKM-04.3		Do you store encryption keys in the cloud?			x		
		EKM-04.4		Do you have separate key management and key usage duties?			x		
Governance and Risk Management Baseline Requirements	GRM-01	GRM-01.1	Baseline security requirements shall be established for developed or acquired, organizationally-owned or managed, physical or virtual, applications and infrastructure systems, and network components that comply with applicable legal, statutory, and regulatory	Do you have documented information security baselines for every component of your infrastructure (e.g., hypervisors, operating systems, routers, DNS servers, etc.)?	x				
		GRM-01.2		Do you have the capability to continuously monitor and report the compliance of your infrastructure against your information security baselines?	x			in partnership with qualified CSP where the application platform is hosted	
Governance and Risk Management Risk Assessments	GRM-02	GRM-02.1	Risk assessments associated with data governance requirements shall be conducted at planned intervals and shall consider the following:	Does your organization's risk assessments take into account awareness of data residency, legal and statutory requirements for retention periods and data protection and classification?	x			in partnership with qualified CSP where the application platform is hosted	
		GRM-02.2	• Awareness of where sensitive data is stored and transmitted across applications, databases, servers.	Do you conduct risk assessments associated with data governance requirements at least once a year?	x				
Governance and Risk Management Oversight	GRM-03	GRM-03.1	Managers are responsible for maintaining awareness of, and complying with, security policies, procedures, and standards that are relevant to their area of responsibility.	Are your technical, business, and executive managers responsible for maintaining awareness of and compliance with security policies, procedures, and standards for both themselves and their employees as they pertain to the manager and employees' area of responsibility?	x				
Governance and Risk Management Management	GRM-04	GRM-04.1	An Information Security Management Program (ISMP) shall be developed, documented, approved, and implemented that includes administrative, technical, and	Do you provide tenants with documentation describing your Information Security Management Program (ISMP)?			x		
		GRM-04.2	implemented that includes administrative, technical, and	Do you review your Information Security Management Program (ISMP) at least once a year?			x		
Governance and Risk Management Management Support / Involvement	GRM-05	GRM-05.1	Executive and line management shall take formal action to support information security through clearly documented direction and commitment, and shall ensure the action has been assigned.	Do executive and line management take formal action to support information security through clearly-documented direction and commitment, and ensure the action has been assigned?	x				
Governance and Risk Management Policy	GRM-06	GRM-06.1	Information security policies and procedures shall be established and made readily available for review by all impacted personnel and external business	Are your information security policies and procedures made available to all impacted personnel and business partners, authorized by accountable business role/function and supported by the information security management program as per industry best practices (e.g. ISO 27001, SOC 2)?	x				

		GRM-06.2	relationships. Information security policies must be authorized by the organization's business leadership (or other accountable business role or function) and supported by a strategic business plan and an information security management program inclusive of defined information security roles and responsibilities for business leadership.	Are information security policies authorized by the organization's business leadership (or other accountable business role or function) and supported by a strategic business plan and an information security management program inclusive of defined information security roles and responsibilities for business leadership?	x			
		GRM-06.3		Do you have agreements to ensure your providers adhere to your information security and privacy policies?	x			
		GRM-06.4		Can you provide evidence of due diligence mapping of your controls, architecture, and processes to regulations and/or standards?	x			
		GRM-06.5		Do you disclose which controls, standards, certifications, and/or regulations you comply with?	x			
Governance and Risk Management	GRM-07	GRM-07.1	A formal disciplinary or sanction policy shall be established for employees who have violated security	Is a formal disciplinary or sanction policy established for employees who have violated security policies and procedures?	x			
Governance and Risk Management	GRM-08	GRM-08.1	Risk assessment results shall include updates to security policies, procedures, standards, and controls to ensure that they remain relevant and effective.	Are employees made aware of what actions could be taken in the event of a violation via their policies and procedures?	x			
Governance and Risk Management	GRM-09	GRM-09.1	The organization's business leadership (or other accountable business role or function) shall review the information security policy at planned intervals or	Do risk assessment results include updates to security policies, procedures, standards, and controls to ensure they remain relevant and effective?	x			
Governance and Risk Management	GRM-10	GRM-10.1	Aligned with the enterprise-wide framework, formal risk assessments shall be performed at least annually or at planned intervals, (and in conjunction with any changes to information systems) to determine the	Do you notify your tenants when you make material changes to your information security and/or privacy policies?	x			
Governance and Risk Management	GRM-11	GRM-11.1	Risks shall be mitigated to an acceptable level. Acceptance levels based on risk criteria shall be established and documented in accordance with reasonable resolution time frames and stakeholder approval.	Do you perform, at minimum, annual reviews to your privacy and security policies?	x			
Human Resources	HRS-01	HRS-01.1	Upon termination of workforce personnel and/or expiration of external business relationships, all organizationally-owned assets shall be returned within an established period.	Are formal risk assessments aligned with the enterprise-wide framework and performed at least annually, or at planned intervals, determining the likelihood and impact of all identified risks, using qualitative and quantitative methods?	x			
Human Resources	HRS-02	HRS-02.1	Pursuant to local laws, regulations, ethics, and contractual constraints, all employment candidates, contractors, and third parties shall be subject to background verification proportional to the data classification to be accessed, the business requirements, and acceptable risk.	Is the likelihood and impact associated with inherent and residual risk determined independently, considering all risk categories?	x			
Human Resources	HRS-03	HRS-03.1	Employment agreements shall incorporate provisions and/or terms for adherence to established information governance and security policies and must be signed by newly hired or on-boarded workforce personnel (e.g., full or part-time employee or contingent staff) prior to granting workforce	Do you have a documented, organization-wide program in place to manage risk?	x			Regular risk assessments are conducted according to ISO 31000 standard
Human Resources	HRS-04	HRS-04.1	Roles and responsibilities for performing employment termination or change in employment procedures shall be assigned, documented, and communicated.	Do you make available documentation of your organization-wide risk management program?	x			
Human Resources	HRS-05	HRS-05.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to manage business risks associated with permitting mobile device access to corporate resources and may require the implementation of higher assurance compensating controls and acceptable-use policies and procedures (e.g., mandated security training, stronger identity, entitlement and access controls, and device	Upon termination of contract or business relationship, are employees and business partners adequately informed of their obligations for returning organizationally-owned assets?	x			
Human Resources	HRS-06	HRS-06.1	Requirements for non-disclosure or confidentiality agreements reflecting the organization's needs for the protection of data and operational details shall be identified, documented, and reviewed at planned intervals.	Do you have asset return procedures outlining how assets should be returned within an established period?	x			
Human Resources	HRS-07	HRS-07.1	Roles and responsibilities of contractors, employees, and third-party users shall be documented as they relate to information assets and security.	Pursuant to local laws, regulations, ethics, and contractual constraints, are all employment candidates, contractors, and involved third parties subject to background verification?	x			
Human Resources	HRS-08	HRS-08.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, for defining allowances and conditions for permitting usage of organizationally-	Do your employment agreements incorporate provisions and/or terms in adherence to established information governance and security policies?	x			
Human Resources	HRS-09	HRS-09.1	A security awareness training program shall be established for all contractors, third-party users, and employees of the organization and mandated when appropriate. All individuals with access to organizational data shall receive appropriate awareness training and regular updates in organizational procedures, processes, and policies relating to their professional function relative to the organization.	Do you require that employment agreements are signed by newly hired or on-boarded workforce personnel prior to granting workforce personnel user access to corporate facilities, resources, and assets?	x			
Human Resources	HRS-10	HRS-10.1	All personnel shall be made aware of their roles and responsibilities for:	Are documented policies, procedures, and guidelines in place to govern change in employment and/or termination?	x			
Human Resources	HRS-11	HRS-11.1	Policies and procedures shall be established to require that unattended workspaces do not have openly visible (e.g., on a desktop) sensitive documents and user computing sessions had been disabled after an established period of inactivity.	Do the above procedures and guidelines account for timely revocation of access and return of assets?	x			
Identity & Access Management	IAM-01	IAM-01.1	Access to, and use of, audit tools that interact with the organization's information systems shall be appropriately segmented and restricted to prevent compromise and misuse of log data.	Are policies and procedures established and measures implemented to strictly limit access to your sensitive data and tenant data from portable and mobile devices (e.g., laptops, cell phones, and personal digital assistants (PDAs)), which are generally higher-risk than non-portable devices (e.g., desktop computers at the provider organization's facilities)?	x			
Identity & Access Management	IAM-02	IAM-02.1	User access policies and procedures shall be established, and supporting business processes and technical measures implemented, for ensuring appropriate identity, entitlement, and access management for all internal corporate and customer (tenant) users with access to data and organizationally-owned or managed (physical and virtual) application interfaces and infrastructure network and systems components. These policies, procedures, processes, and measures must	Are requirements for non-disclosure or confidentiality agreements reflecting the organization's needs for the protection of data and operational details identified, documented, and reviewed at planned intervals?	x			
Identity & Access Management	IAM-03	IAM-03.1	User access to diagnostic and configuration ports shall be restricted to authorized individuals and applications.	Do you provide tenants with a role definition document clarifying your administrative responsibilities versus those of the tenant?	x			
Identity & Access Management	IAM-04	IAM-04.1	Policies and procedures shall be established to store and manage identity information about every person who accesses IT infrastructure and to determine their level of access.	Do you have policies and procedures in place to define allowances and conditions for permitting usage of organizationally-owned or managed user end-point devices and IT infrastructure network and systems components?	x			x the company does not plan to use BYOD.
Identity & Access Management	IAM-05	IAM-05.1	User access policies and procedures shall be established, and supporting business processes and technical measures implemented, for restricting user access as per defined segregation of duties to address business risks associated with a user-role conflict of interest.	Do you define allowance and conditions for BYOD devices and its applications to access corporate resources?	x			x the company does not plan to use BYOD.
Identity & Access Management	IAM-06	IAM-06.1	Access to the organization's own developed applications, program, or object source code, or any other form of intellectual property (IP), and use of proprietary software shall be appropriately restricted following the rule of least privilege based on job	Do you provide a formal, role-based, security awareness training program for cloud-related access and data management issues (e.g., multi-tenancy, nationality, cloud delivery model, segregation of duties implications, and conflicts of interest) for all persons with access to tenant data?	x			
Identity & Access Management	IAM-07	IAM-07.1	The identification, assessment, and prioritization of risks posed by business processes requiring third-party access to the organization's information systems and data shall be followed by coordinated analysis.	Do you specifically train your employees regarding their specific role and the information security controls they must fulfill?	x			
Identity & Access Management	IAM-08	IAM-08.1	Policies and procedures are established for permissible storage and access of identities used for authentication to ensure identities are only accessible based on rules of least privilege and replication limitation only to users explicitly defined as business necessary.	Do you document employee acknowledgment of training they have completed?	x			
Identity & Access Management	IAM-09	IAM-09.1	Provisioning user access (e.g., employees, contractors, customers (tenants), business partners and/or supplier relationships) to data and organizationally-owned or managed (physical and virtual) applications, infrastructure systems, and network components shall be restricted as per the following, ensuring appropriate identity, entitlement, and access management and in accordance with established policies and procedures:	Is successful and timed completion of the training program(s) considered a prerequisite for acquiring and maintaining access to sensitive systems?	x			
Identity & Access Management	IAM-10	IAM-10.1	User access shall be authorized and revalidated for entitlement appropriateness, at planned intervals, by the organization's business leadership or other accountable business role or function supported by evidence to demonstrate the organization is adhering to the rule of least privilege based on job function. For identified access violations, remediation must follow established user access policies and procedures.	Are personnel trained and provided with awareness programs at least once a year?	x			
Identity & Access Management	IAM-11	IAM-11.1	Timely de-provisioning (revocation or modification) of user access to data and organizationally-owned or managed (physical and virtual) applications, infrastructure systems, and network components shall be restricted as per the following, ensuring appropriate identity, entitlement, and access management and in accordance with established policies and procedures:	Are administrators and data stewards properly educated on their legal responsibilities with regard to security and data integrity?	x			
Identity & Access Management	IAM-12	IAM-12.1	Internal corporate or customer (tenant) user account credentials shall be restricted as per the following, ensuring appropriate identity, entitlement, and access management and in accordance with established policies and procedures:	Are personnel informed of their responsibilities for maintaining awareness and compliance with published security policies, procedures, standards, and applicable regulatory requirements?	x			
Identity & Access Management	IAM-13	IAM-13.1	Identity trust verification and service-to-service application (API) and information processing interoperability (e.g., SSO and Federation)	Are personnel informed of their responsibilities for maintaining a safe and secure working environment?	x			
Identity & Access Management	IAM-14	IAM-14.1	Account credential lifecycle management from instantiation through revocation	Are personnel informed of their responsibilities for ensuring that equipment is secured and not left unattended?	x			
Identity & Access Management	IAM-15	IAM-15.1		Are all computers and laptops configured such that there is lockout screen after a pre-defined amount of time?	x			
Identity & Access Management	IAM-16	IAM-16.1		Are there policies and procedures to ensure that unattended workspaces do not have openly visible (e.g., on a desktop) sensitive documents?	x			
Identity & Access Management	IAM-17	IAM-17.1		Do you restrict, log, and monitor access to your information security management systems (e.g., hypervisors, firewalls, vulnerability scanners, network sniffers, APIs, etc.)?	x			
Identity & Access Management	IAM-18	IAM-18.1		Do you monitor and log privileged access (e.g., administrator level) to information security management systems?	x			
Identity & Access Management	IAM-19	IAM-19.1		Do you have controls in place ensuring timely removal of systems access that is no longer required for business purposes?	x			
Identity & Access Management	IAM-20	IAM-20.1		Do you have policies, procedures and technical measures in place to ensure appropriate data/assets access management in adherence to legal, statutory or regulatory compliance requirements?	x			
Identity & Access Management	IAM-21	IAM-21.1		Do you have procedures and technical measures in place for user account entitlement de-/provisioning based on the rule of least privilege?	x			
Identity & Access Management	IAM-22	IAM-22.1		Do you enforce data access permissions based on the rules of Authentication, Authorization and Accountability (AAA)?	x			
Identity & Access Management	IAM-23	IAM-23.1		Do your policies and procedures incorporate security controls for establishing higher levels of assurance for critical business case considerations, supported by multifactor authentication?	x			Multifactor authentication is not available,
Identity & Access Management	IAM-24	IAM-24.1		Do you provide metrics to track the speed with which you are able to remove systems access that is no longer required for business purposes?	x			
Identity & Access Management	IAM-25	IAM-25.1		Is user access to diagnostic and configuration ports restricted to authorized individuals and applications?	x			
Identity & Access Management	IAM-26	IAM-26.1		Do you manage and store the identity of all personnel who have access to the IT infrastructure, including their level of access?	x			
Identity & Access Management	IAM-27	IAM-27.1		Do you manage and store the user identity of all personnel who have network access, including their level of access?	x			
Identity & Access Management	IAM-28	IAM-28.1		Do you provide tenants with documentation on how you maintain segregation of duties within your cloud service offering?	x			
Identity & Access Management	IAM-29	IAM-29.1		Are controls in place to prevent unauthorized access to your application, program, or object source code, and assure it is restricted to authorized personnel only?	x			
Identity & Access Management	IAM-30	IAM-30.1		Are controls in place to prevent unauthorized access to tenant application, program, or object source code, and assure it is restricted to authorized personnel only?	x			
Identity & Access Management	IAM-31	IAM-31.1		Does your organization conduct third-party unauthorized access risk assessments?	x			
Identity & Access Management	IAM-32	IAM-32.1		Are preventive, detective, corrective compensating controls in place to mitigate impacts of unauthorized or inappropriate access?	x			
Identity & Access Management	IAM-33	IAM-33.1		Do you document how you grant, approve and enforce access restrictions to tenant/customer credentials following the rules of least privilege?	x			Personnel is not allowed to access to customer's data (except for emergency)
Identity & Access Management	IAM-34	IAM-34.1		Based on the rules of least privilege, do you have policies and procedures established for permissible storage and access of identities used for authentication?	x			
Identity & Access Management	IAM-35	IAM-35.1		Do you limit identities' replication only to users explicitly defined as business necessary?	x			
Identity & Access Management	IAM-36	IAM-36.1		Does your management provision the authorization and restrictions for user access (e.g., employees, contractors, customers (tenants), business partners, and/or suppliers) prior to their access to data and any owned or managed (physical and virtual) applications, infrastructure systems, and network components?	x			
Identity & Access Management	IAM-37	IAM-37.1		Do you provide upon the request of users with legitimate interest access (e.g., employees, contractors, customers (tenants), business partners and/or suppliers) to data and any owned or managed (physical and virtual) applications, infrastructure systems and network components?	x			
Identity & Access Management	IAM-38	IAM-38.1		Do you require a periodical authorization and validation (e.g. at least annually) of the entitlements for all system users and administrators (exclusive of users maintained by your tenants), based on the rule of least privilege, by business leadership or other accountable business role or function?	x			
Identity & Access Management	IAM-39	IAM-39.1		Do you collect evidence to demonstrate that the policy (see question IAM-10.1) has been enforced?	x			
Identity & Access Management	IAM-40	IAM-40.1		Do you ensure that remediation actions for access violations follow user access policies?	x			
Identity & Access Management	IAM-41	IAM-41.1		Will you share user entitlement and remediation reports with your tenants, if inappropriate access may have been allowed to tenant data?	x			
Identity & Access Management	IAM-42	IAM-42.1		Is timely de-provisioning, revocation, or modification of user access to the organizations systems, information assets, and data implemented upon any change in status of employees, contractors, customers, business partners, or involved third parties?	x			
Identity & Access Management	IAM-43	IAM-43.1		Is any change in user access status intended to include termination of employment, contract or agreement, change of employment or transfer within the organization?	x			
Identity & Access Management	IAM-44	IAM-44.1		Do you support use of, or integration with, existing customer-based Single Sign On (SSO) solutions to your service?	x			
Identity & Access Management	IAM-45	IAM-45.1		Do you use open standards to delegate authentication capabilities to your tenants?	x			
Identity & Access Management	IAM-46	IAM-46.1		Do you support identity federation standards (e.g., SAML, SPML, WS-Federation, etc.) as a means of authenticating/authorizing users?	x			
Identity & Access Management	IAM-47	IAM-47.1		Do you have a Policy Enforcement Point capability (e.g., XACML) to enforce regional legal and policy constraints on user access?	x			
Identity & Access Management	IAM-48	IAM-48.1		Do you have an identity management system (enabling classification of data for a tenant) in place to enable both role-based and context-based entitlement to data?	x			

		IAM-12.6	Account credential and/or identity store minimization or re-use when feasible	Do you provide tenants with strong (multifactor) authentication options (e.g., digital certs, tokens, biometrics, etc.) for user access?		x		
		IAM-12.7	Adherence to industry acceptable and/or regulatory compliant authentication, authorization, and accounting (AAA) rules (e.g., strong/multi-factor, expirable, non-shared authentication secrets)	Do you allow tenants to use third-party identity assurance services?		x		
		IAM-12.8		Do you support password (e.g., minimum length, age, history, complexity) and account lockout (e.g., lockout threshold, lockout duration) policy enforcement?	x			
		IAM-12.9		Do you allow tenants/customers to define password and account lockout policies for their accounts?		x		On customer's request, only administrator user can modify password and account lockout policies, within established limits in general security policies.
		IAM-12.10		Do you support the ability to force password changes upon first logon?	x			
		IAM-12.11		Do you have mechanisms in place for unlocking accounts that have been locked out (e.g., self-service via email, defined challenge questions, manual unlock)?	x			
Identity & Access Management	IAM-13	IAM-13.1	Utility programs capable of potentially overriding system, object, network, virtual machine, and application controls shall be restricted.	Are access to utility programs used to manage virtualized partitions (e.g. shutdown, clone, etc) appropriately restricted and monitored?	x			
Infrastructure & Virtualization Security	IVS-01	IVS-01.1	Higher levels of assurance are required for protection, retention, and lifecycle management of audit logs, adhering to applicable legal, statutory, or regulatory compliance obligations and providing unique user access accountability to detect potentially suspicious network behaviors and/or file integrity anomalies, and to support forensic investigative capabilities in the event of a security breach.	Are file integrity (host) and network intrusion detection (IDS) tools implemented to help facilitate timely detection, investigation by root cause analysis, and response to incidents?	x			
		IVS-01.2		Is physical and logical user access to audit logs restricted to authorized personnel?	x			
		IVS-01.3		Can you provide evidence that due diligence mapping of regulations and standards to your controls/architecture/processes has been performed?	x			
		IVS-01.4		Are audit logs centrally stored and retained?		x		
		IVS-01.5		Are audit logs reviewed on a regular basis for security events (e.g., with automated tools)?		x		
Infrastructure & Virtualization Security	IVS-02	IVS-02.1	The provider shall ensure the integrity of all virtual machine images at all times. Any changes made to virtual machine images must be logged and an alert raised regardless of their running state (e.g., dormant, off, or running). The results of a change or move of an image and the subsequent validation of the image's integrity shall be used to synchronize the system clocks of all relevant information processing systems to facilitate tracing and reconstitution of activity timelines.	Do you log and alert any changes made to virtual machine images regardless of their running state (e.g., dormant, off or running)?	x			
		IVS-02.2		Does the virtual machine management infrastructure include a tamper audit or software integrity function to detect changes to the build/configuration of the virtual machine?	x			There are mechanisms to identify any changes to virtual machines' configuration.
		IVS-02.3		Are changes made to virtual machines, or moving of an image and subsequent validation of the image's integrity, made immediately available to customers through electronic methods (e.g., portals or alerts)?		x		
Infrastructure & Virtualization Security	IVS-03	IVS-03.1	A reliable and mutually agreed upon external time source shall be used to synchronize the system clocks of all relevant information processing systems to facilitate tracing and reconstitution of activity timelines.	Do you use a synchronized time-service protocol (e.g., NTP) to ensure all systems have a common time reference?	x			
Infrastructure & Virtualization Security	IVS-04	IVS-04.1	The availability, quality, and adequate capacity and resources shall be planned, prepared, and measured to deliver the required system performance in accordance with legal, statutory, and regulatory compliance obligations. Projections of future capacity requirements shall be made to mitigate the risk of system overload.	Do you provide documentation regarding what levels of system (e.g., network, storage, memory, I/O, etc.) oversubscription you maintain and under what circumstances/scenarios?		x		
		IVS-04.2		Do you restrict use of the memory oversubscription capabilities present in the hypervisor?		x		
		IVS-04.3		Does your system's capacity requirements take into account current, projected, and anticipated capacity needs for all systems used to provide services to the tenants?	x			
		IVS-04.4		Is system performance monitored and tuned in order to continuously meet regulatory, contractual, and business requirements for all the systems used to provide services to the tenants?	x			
Infrastructure & Virtualization Security	IVS-05	IVS-05.1	Implementers shall ensure that the security vulnerability assessment tools or services accommodate the virtualization technologies used (e.g., virtualization aware).	Do security vulnerability assessment tools or services accommodate the virtualization technologies being used (e.g., virtualization aware)?		x		
Infrastructure & Virtualization Security	IVS-06	IVS-06.1	Network environments and virtual instances shall be designed and configured to restrict and monitor traffic between trusted and untrusted connections. These configurations shall be reviewed at least annually, and supported by a documented justification for use for all allowed services, protocols, ports, and compensating controls.	For your IaaS offering, do you provide customers with guidance on how to create a layered security architecture equivalence using your virtualized solution?			x	We don't offer IaaS.
		IVS-06.2		Do you regularly update network architecture diagrams that include data flows between security domains/zones?	x			
		IVS-06.3		Do you regularly review for appropriateness the allowed access/connectivity (e.g., firewall rules) between security domains/zones within the network?	x			
		IVS-06.4		Are all firewall access control lists documented with business justification?	x			
Infrastructure & Virtualization Security	IVS-07	IVS-07.1	Each operating system shall be hardened to provide only necessary ports, protocols, and services to meet business needs and have in place supporting technical controls such as: antivirus, file integrity monitoring, and logging as part of their baseline operating build standard or template.	Are operating systems hardened to provide only the necessary ports, protocols, and services to meet business needs using technical controls (e.g., antivirus, file integrity monitoring, and logging) as part of their baseline build standard or template?	x			
Infrastructure & Virtualization Security	IVS-08	IVS-08.1	Production and non-production environments shall be separated to prevent unauthorized access or changes to information assets. Separation of the environments may include: stateful inspection firewalls, domain/realm authentication sources, and clear segregation of duties for personnel accessing these environments as part of their job duties.	For your SaaS or PaaS offering, do you provide tenants with separate environments for production and test processes?	x			Tenants' databases are separated for production and test environments. Different web applications are sometimes on the same virtual machine.
		IVS-08.2		For your IaaS offering, do you provide tenants with guidance on how to create suitable production and test environments?			x	We don't offer IaaS.
		IVS-08.3		Do you logically and physically segregate production and non-production environments?	x			Tenants' databases are separated for production and test environments. Different web applications are sometimes on the same virtual machine.
Infrastructure & Virtualization Security	IVS-09	IVS-09.1	Multi-tenant organizationally-owned or managed (physical and virtual) applications, and infrastructure system and network components, shall be designed, developed, deployed, and configured such that provider and customer (tenant) user access is appropriately segmented from other tenant users, based on the following considerations: • Established policies and procedures • Isolation of business critical assets and/or sensitive user data and sessions that mandate stronger internal controls	Are system and network environments protected by a firewall or virtual firewall to ensure business and customer security requirements?	x			
		IVS-09.2		Are system and network environments protected by a firewall or virtual firewall to ensure compliance with legal, regulatory and contractual requirements?	x			
		IVS-09.3		Have you implemented the necessary measures for the appropriate isolation and segmentation of tenants' access to infrastructure system and network components, in adherence to established policies, legal, statutory, and regulatory compliance obligations?	x			
		IVS-09.4		Do you have the ability to logically segment or encrypt customer data such that data may be produced for a single tenant only, without inadvertently accessing another tenant's data?	x			
		IVS-09.5		Are system and network environments protected by a firewall or virtual firewall to ensure protection and isolation of sensitive data?	x			
Infrastructure & Virtualization Security	IVS-10	IVS-10.1	Secured and encrypted communication channels shall be used when migrating physical servers, applications, or data to virtualized servers and, where possible, shall use a network segregated from production-level access.	Are secured and encrypted communication channels used when migrating physical servers, applications, or data to virtual servers?	x		x	
Infrastructure & Virtualization Security	IVS-11	IVS-11.1	Access to all hypervisor management functions or administrative consoles for systems hosting virtualized systems shall be restricted to personnel based upon the principle of least privilege and supported through technical controls (e.g., two-factor authentication, audit trails, IP address filtering, firewalls, and TLS encapsulated communications to the administrative consoles).	Do you restrict personnel access to all hypervisor management functions or administrative consoles for systems hosting virtualized systems based on the principle of least privilege and supported through technical controls (e.g., two-factor authentication, audit trails, IP address filtering, firewalls, and TLS encapsulated communications to the administrative consoles)?	x			
Infrastructure & Virtualization Security	IVS-12	IVS-12.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to protect wireless network environments, including the following: • Perimeter firewalls implemented and configured to restrict unauthorized traffic • Security settings enabled with strong encryption for network architecture diagrams shall clearly identify high-risk environments and data flows that may have legal compliance impacts. Technical measures shall be implemented and shall apply defense-in-depth techniques (e.g., deep packet analysis, traffic throttling and black-holing) for detection and timely response to network-based attacks associated with anomalous ingress or egress traffic patterns (e.g., MAC spoofing and ARP poisoning attacks) and/or distributed denial-of-service (DDoS) attacks?	Are policies and procedures established and mechanisms configured and implemented to protect the wireless network environment perimeter and to restrict unauthorized wireless traffic?			x	
		IVS-12.2		Are policies and procedures established and mechanisms implemented to ensure wireless security settings are enabled with strong encryption for authentication and transmission, replacing vendor default settings (e.g., encryption keys, passwords, SNMP community strings)?			x	Backend system is not directly accessible from a wireless network.
		IVS-12.3		Are policies and procedures established and mechanisms implemented to protect wireless network environments and detect the presence of unauthorized (rogue) network devices for a timely disconnect from the network?			x	
Infrastructure & Virtualization Security	IVS-13	IVS-13.1	Network architecture diagrams shall clearly identify high-risk environments and data flows that may have legal compliance impacts. Technical measures shall be implemented and shall apply defense-in-depth techniques (e.g., deep packet analysis, traffic throttling and black-holing) for detection and timely response to network-based attacks associated with anomalous ingress or egress traffic patterns (e.g., MAC spoofing and ARP poisoning attacks) and/or distributed denial-of-service (DDoS) attacks?	Do your network architecture diagrams clearly identify high-risk environments and data flows that may have legal compliance impacts?	x			In partnership with qualified CSP where the application platform is hosted
		IVS-13.2		Do you implement technical measures and apply defense-in-depth techniques (e.g., deep packet analysis, traffic throttling and black-holing) for detection and timely response to network-based attacks associated with anomalous ingress or egress traffic patterns (e.g., MAC spoofing and ARP poisoning attacks) and/or distributed denial-of-service (DDoS) attacks?	x			In partnership with qualified CSP where the application platform is hosted
Interoperability & Portability	IPY-01	IPY-01.1	The provider shall use open and published APIs to ensure support for interoperability between components and to facilitate migrating applications.	Do you publish a list of all APIs available in the service and indicate which are standard and which are customized?	x			
Interoperability & Portability	IPY-02	IPY-02.1	All structured and unstructured data shall be available to the customer and provided to them upon request in an industry-standard format (e.g., .doc, .xls, .pdf, logs, and flat files).	Is unstructured customer data available on request in an industry-standard format (e.g., .doc, .xls, or .pdf)?	x			on customer's request
Interoperability & Portability	IPY-03	IPY-03.1	Policies, procedures, and mutually-agreed upon provisions and/or terms shall be established to satisfy customer (tenant) requirements for services-to-service application (API) and information processing interoperability, and portability for application	Do you provide policies and procedures (i.e. service level agreements) governing the use of APIs for interoperability between your service and third-party applications?	x			
		IPY-03.2		If using virtual infrastructure, do you allow virtual machine images to be downloaded and ported to a new cloud provider?		x		
		IPY-03.3		Do you provide policies and procedures (i.e. service level agreements) governing the migration of application data to and from your service?	x			
Interoperability & Portability	IPY-04	IPY-04.1	The provider shall use secure (e.g., non-clear text and authenticated) standardized network protocols for the import and export of data and to manage the service, and shall make available a document to consumers.	Is data import, data export, and service management be conducted over secure (e.g., non-clear text and authenticated), industry accepted standardized network protocols?	x			
		IPY-04.2		Do you provide consumers (tenants) with documentation detailing the relevant interoperability and portability network protocol standards that are involved?	x			on customer's request
Interoperability & Portability	IPY-05	IPY-05.1	The provider shall use an industry-recognized virtualization platform and standard virtualization formats (e.g., OVF) to help ensure interoperability, and shall have documented custom changes made to any hypervisor in use, and all solution-specific virtualization hooks available for customer review.	Do you use an industry-recognized virtualization platform and standard virtualization formats (e.g., OVF) to help ensure interoperability?	x			Service is implemented on DataCenter of the qualified CSP.
		IPY-05.2		If using virtual infrastructure, are machine images made available to the customer in a way that would allow the customer to replicate those images in their own off-site storage location?		x		
		IPY-05.3		Do you have documented custom changes made to any hypervisor in use, and all solution-specific virtualization hooks available for customer review?			x	Service is implemented on DataCenter of the qualified CSP.
Mobile Security	MOS-01	MOS-01.1	Anti-malware awareness training, specific to mobile devices, shall be included in the provider's information security awareness training.	Do you provide anti-malware training specific to mobile devices as part of your information security awareness training?	x			
Mobile Security	MOS-02	MOS-02.1	A documented list of approved application stores has been communicated as acceptable for mobile devices accessing or storing provider managed data.	Do you document and make available lists of approved application stores for mobile devices accessing or storing company data and/or company systems?	x			
Mobile Security	MOS-03	MOS-03.1	The company shall have a documented policy prohibiting the installation of non-approved applications or approved applications not obtained through a pre-identified application store.	Do you have a policy enforcement capability (e.g., XACML) to ensure that only approved applications and those from approved application stores can be loaded onto a mobile device?		x		We follow the common best practices.
Mobile Security	MOS-04	MOS-04.1	The BYOD policy and supporting awareness training clearly states the approved applications, application stores, and application extensions and plugins that may be used for BYOD usage.	Does your BYOD policy and training clearly state which applications and applications stores are approved for use on BYOD devices?			x	the company does not plan to use BYOD.
Mobile Security	MOS-05	MOS-05.1	The provider shall have a documented mobile device policy that includes a documented definition for mobile devices and the acceptable usage and requirements for all mobile devices. The provider shall post and communicate the policy and requirements through the company's security awareness and training program.	Do you have a documented mobile device policy in your employee training that clearly defines mobile devices and the accepted usage and requirements for mobile devices?	x			
Mobile Security	MOS-06	MOS-06.1	All cloud-based services used by the company's mobile devices or BYOD shall be pre-approved for usage and the storage of company business data.	Do you have a documented list of pre-approved cloud based services that are allowed to be used for use and storage of company business data via a mobile device?			x	We follow the common best practices.
Mobile Security	MOS-07	MOS-07.1	The company shall have a documented application validation process to test for mobile device, operating system, and application compatibility issues.	Do you have a documented application validation process for testing device, operating system, and application compatibility issues?			x	
Mobile Security	MOS-08	MOS-08.1	The BYOD policy shall define the device and eligibility requirements to allow for BYOD usage.	Do you have a BYOD policy that defines the device(s) and eligibility requirements allowed for BYOD usage?			x	the company does not plan to use BYOD.
Mobile Security	MOS-09	MOS-09.1	An inventory of all mobile devices used to store and access company data shall be kept and maintained. All changes to the status of these devices, (i.e., operating system and patch levels, lost or decommissioned status, and to whom the device is assigned or approved for usage (BYOD)), will be included for each device in the inventory.	Do you maintain an inventory of all mobile devices storing and accessing company data which includes device status (e.g., operating system and patch levels, lost or decommissioned, device assignee)?	x			
Mobile Security	MOS-10	MOS-10.1	A centralized, mobile device management solution shall be deployed to all mobile devices that are permitted to store, transmit, or process customer data.	Do you have a centralized mobile device management solution deployed to all mobile devices that are permitted to store, transmit, or process company data?			x	

Mobile Security Encryption	MOS-11	MOS-11.1	The mobile device policy shall require the use of encryption either for the entire device or for data identified as sensitive on all mobile devices and shall be enforced through technical controls.	Does your mobile device policy require the use of encryption for either the entire device or for data identified as sensitive enforceable through technology controls for all mobile devices?		x		
Mobile Security Jailbreaking and Rooting	MOS-12	MOS-12.1	The mobile device policy shall prohibit the circumvention of built-in security controls on mobile devices (e.g., jailbreaking or rooting) and is enforced through technical controls.	Does your mobile device policy prohibit the circumvention of built-in security controls on mobile devices (e.g., jailbreaking or rooting)?	x			
Mobile Security Legal	MOS-13	MOS-13.1	The BYOD policy includes clarifying language for the expectation of privacy, requirements for litigation, e-discovery, and legal holds. The BYOD policy shall BYOD and/or company owned devices are configured to require an automatic lockout screen, and the requirement shall be enforced through technical controls.	Does your BYOD policy clearly define the expectation of privacy, requirements for litigation, e-discovery, and legal holds?		x		
Mobile Security Lockout Screen	MOS-14	MOS-14.1	BYOD and/or company owned devices are configured to require an automatic lockout screen, and the requirement shall be enforced through technical controls.	Do you require and enforce via technical controls an automatic lockout screen for BYOD and company owned devices?			x	the company does not plan to use BYOD.
Mobile Security Operating Systems	MOS-15	MOS-15.1	Changes to mobile device operating systems, patch levels, and/or applications shall be managed through the company's change management processes.	Do you manage all changes to mobile device operating systems, patch levels, and applications via your company's change management processes?	x			
Mobile Security Passwords	MOS-16	MOS-16.1	Password policies, applicable to mobile devices, shall be documented and enforced through technical controls on all company devices or devices approved for BYOD usage, and shall prohibit the changing of passwords.	Do you have password policies for enterprise issued mobile devices and/or BYOD mobile devices?	x			
		MOS-16.2	Are your password policies enforced through technical controls (i.e. MDM)?			x		
		MOS-16.3	Do your password policies prohibit the changing of authentication requirements (i.e. password/PIN length) via a mobile device?			x		
Mobile Security Policy	MOS-17	MOS-17.1	The mobile device policy shall require the BYOD user to perform backups of data, prohibit the usage of unapproved application stores, and require the use of anti-malware software (where supported).	Do you have a policy that requires BYOD users to perform backups of specified corporate data?			x	
		MOS-17.2	Do you have a policy that requires BYOD users to prohibit the usage of unapproved application stores?				x	
		MOS-17.3	Do you have a policy that requires BYOD users to use anti-malware software (where supported)?				x	
Mobile Security Remote Wipe	MOS-18	MOS-18.1	All mobile devices permitted for use through the company BYOD program or a company-assigned mobile device shall allow for remote wipe by the company.	Does your IT provide remote wipe or corporate data wipe for all company-accepted BYOD devices?			x	
		MOS-18.2	Does your IT provide remote wipe or corporate data wipe for all company-assigned mobile devices?				x	
Mobile Security Security Patches	MOS-19	MOS-19.1	Mobile devices connecting to corporate networks or storing and accessing company information shall allow for remote validation to download the latest security patches by company IT personnel.	Do your mobile devices have the latest available security-related patches installed upon general release by the device manufacturer or carrier?	x			
		MOS-19.2	Do your mobile devices allow for remote validation to download the latest security patches by company IT personnel?				x	
Mobile Security Users	MOS-20	MOS-20.1	The BYOD policy shall clarify the systems and servers allowed for use or access on a BYOD-enabled device.	Does your BYOD policy clarify the systems and servers allowed for use or access on the BYOD-enabled device?			x	
		MOS-20.2	Does your BYOD policy specify the user roles that are allowed access via a BYOD-enabled device?				x	the company does not plan to use BYOD.
Security Incident Management, E-Discovery, & Cloud Forensics Contact / Authority Maintenance	SEF-01	SEF-01.1	Points of contact for applicable regulation authorities, national and local law enforcement, and other legal jurisdictional authorities shall be maintained and regularly updated (e.g., change in impacted-scope and/or a change in any compliance obligation) to ensure direct compliance liaisons have been established and to be prepared for a forensic investigation requiring rapid engagement with law enforcement.	Do you maintain liaisons and points of contact with local authorities in accordance with contracts and appropriate regulations?	x			
Security Incident Management, E-Discovery, & Cloud Forensics Incident Management	SEF-02	SEF-02.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to triage security-related events and ensure timely and thorough incident management, as per established IT service management policies and procedures.	Do you have a documented security incident response plan?	x			
		SEF-02.2	Do you integrate customized tenant requirements into your security incident response plans?			x		
		SEF-02.3	Do you publish a roles and responsibilities document specifying what you vs. your tenants are responsible for during security incidents?			x		
		SEF-02.4	Have you tested your security incident response plans in the last year?		x			
Security Incident Management, E-Discovery, & Cloud Forensics Incident Reporting	SEF-03	SEF-03.1	Workforce personnel and external business relationships shall be informed of their responsibility and, if required, shall consent and/or contractually agree to report all information security events in a timely manner. Information security events shall be reported through predefined communications.	Are workforce personnel and external business relationships adequately informed of their responsibility, and, if required, consent and/or contractually required to report all information security events in a timely manner?	x			
		SEF-03.2	Do you have predefined communication channels for workforce personnel and external business partners to report incidents in a timely manner adhering to applicable legal, statutory, or regulatory compliance obligations?		x			
Security Incident Management, E-Discovery, & Cloud Forensics Incident Response Legal Preparation	SEF-04	SEF-04.1	Proper forensic procedures, including chain of custody, are required for the presentation of evidence to support potential legal action subject to the relevant jurisdiction after an information security incident. Upon notification, customers and/or other external business partners impacted by a security breach shall be given the opportunity to participate as is legally permissible in the forensic investigation.	Does your incident response plan comply with industry standards for legally admissible chain-of-custody management processes and controls?	x			
		SEF-04.2	Does your incident response capability include the use of legally admissible forensic data collection and analysis techniques?		x			
		SEF-04.3	Are you capable of supporting litigation holds (freeze of data from a specific point in time) for a specific tenant without freezing other tenant data?		x			
		SEF-04.4	Do you enforce and attest to tenant data separation when producing data in response to legal subpoenas?		x			
Security Incident Management, E-Discovery, & Cloud Forensics Incident Response Metrics	SEF-05	SEF-05.1	Mechanisms shall be put in place to monitor and quantify the types, volumes, and costs of information security incidents.	Do you monitor and quantify the types, volumes, and impacts on all information security incidents?	x			
		SEF-05.2	Will you share statistical information for security incident data with your tenants upon request?		x			on customer's request
Supply Chain Management, Transparency, and Accountability Data Quality and Integrity	STA-01	STA-01.1	Providers shall inspect, account for, and work with their cloud supply-chain partners to correct data quality errors and associated risks. Providers shall design and implement controls to mitigate and contain data security risks through proper separation of duties, role-based access, and least-privilege access.	Do you inspect and account for data quality errors and associated risks, and work with your cloud supply-chain partners to correct them?		x		The application platform is hosted from a qualified CSP; there are no other suppliers within the entire chain.
		STA-01.2	Do you design and implement controls to mitigate and contain data security risks through proper separation of duties, role-based access, and least-privilege access for all personnel within your supply chain?		x			
Supply Chain Management, Transparency, and Accountability Incident Reporting	STA-02	STA-02.1	The provider shall make security incident information available to all affected customers and providers periodically through electronic methods (e.g., portals).	Do you make security incident information available to all affected customers and providers periodically through electronic methods (e.g., portals)?	x			on customer's request
Supply Chain Management, Transparency, and Accountability Incident Reporting	STA-03	STA-03.1	Business-critical or customer (tenant) impacting (physical and virtual) application and system-system interface (API) designs and configurations, and infrastructure network and systems components shall be reviewed and approved by the provider. The provider shall perform annual internal assessments of conformance and effectiveness of its policies, procedures, and supporting measures and metrics.	Do you collect capacity and use data for all relevant components of your cloud service offering?		x		
		STA-03.2	Do you provide tenants with capacity planning and use reports?			x		on customer's request
Supply Chain Management, Transparency, and Accountability Provider Internal Assessments	STA-04	STA-04.1	Do you perform annual internal assessments of conformance and effectiveness of your policies, procedures, and supporting measures and metrics?		x			
Supply Chain Management, Transparency, and Accountability Third Party Agreements	STA-05	STA-05.1	Supply chain agreements (e.g., SLAs) between providers and customers (tenants) shall incorporate at least the following mutually-agreed upon provisions and/or terms: • Scope of business relationship and services offered (e.g., customer (tenant) data acquisition, exchange and usage, feature sets and functionality, personnel and infrastructure network and systems components for service delivery and support, roles and responsibilities of provider and customer (tenant) and any subcontracted or outsourced business relationships, physical geographical location of hosted services, and any known regulatory compliance considerations) • Information security requirements, provider and customer (tenant) primary points of contact for the duration of the business relationship, and references to detailed supporting and relevant business processes and technical measures implemented to enable effectively governance, risk management, assurance and legal, statutory and regulatory compliance obligations by all impacted business relationships • Notification and/or pre-authorization of any changes controlled by the provider with customer (tenant) impacts • Timely notification of a security incident (or	Do you select and monitor outsourced providers in compliance with laws in the country where the data is processed, stored, and transmitted?	x			
		STA-05.2	Do you select and monitor outsourced providers to ensure that they are in compliance with applicable legislation?		x			
		STA-05.3	Does legal counsel review all third-party agreements?		x			
		STA-05.4	Do third-party agreements include provision for the security and protection of information and assets?		x			
		STA-05.5	Do you have the capability to recover data for a specific customer in the case of a failure or data loss?		x			
		STA-05.6	Do you have the capability to restrict the storage of customer data to specific countries or geographic locations?		x			Data Center is placed in Italy.
		STA-05.7	Can you provide the physical location/geography of storage of a tenant's data upon request?		x			
		STA-05.8	Can you provide the physical location/geography of storage of a tenant's data in advance?		x			
		STA-05.9	Do you allow tenants to define acceptable geographical locations for data routing or resource instantiation?			x		Data Center is unique for all customers and placed in Italy.
		STA-05.10	Are systems in place to monitor for privacy breaches and notify tenants expeditiously if a privacy event may have impacted their data?		x			
		STA-05.11	Do you allow tenants to opt out of having their data/metadata accessed via inspection technologies?			x		
		STA-05.12	Do you provide the client with a list and copies of all subprocessing agreements and keep this updated?			x		
Supply Chain Management, Transparency, and Accountability Supply Chain Governance	STA-06	STA-06.1	Providers shall review the risk management and governance processes of their partners so that practices are consistent and aligned to account for risks inherited from other members of that partner's cloud supply chain.	Do you review the risk management and governance processes of partners to account for risks inherited from other members of that partner's supply chain?		x		The application platform is hosted from a qualified CSP; there are no other suppliers within the entire chain.
Supply Chain Management, Transparency, and Accountability Supply Chain Metrics	STA-07	STA-07.1	Policies and procedures shall be implemented to ensure the consistent review of service agreements (e.g., SLAs) between providers and customers (tenants) across the relevant supply chain (upstream/downstream). Reviews shall be performed at least annually and identify non-conformance to established agreements. The reviews should result in actions to address service-level conflicts or inconsistencies resulting from disparate supplier relationships.	Are policies and procedures established, and supporting business processes and technical measures implemented, for maintaining complete, accurate, and relevant agreements (e.g., SLAs) between providers and customers (tenants)?	x			
		STA-07.2	Do you have the ability to measure and address non-conformance of provisions and/or terms across the entire supply chain (upstream/downstream)?			x		The application platform is hosted from a qualified CSP; there are no other suppliers within the entire chain.
		STA-07.3	Can you manage service-level conflicts or inconsistencies resulting from disparate supplier relationships?		x			
		STA-07.4	Do you provide tenants with ongoing visibility and reporting of your operational Service Level Agreement (SLA) performance?		x			on customer's request
		STA-07.5	Do you make standards-based information security metrics (CSA, CMM, etc.) available to your tenants?		x			on customer's request
		STA-07.6	Do you provide customers with ongoing visibility and reporting of your SLA performance?		x			on customer's request
		STA-07.7	Do your data management policies and procedures address tenant and service level conflicts of interests?		x			on customer's request
		STA-07.8	Do you review all service level agreements at least annually?		x			
Supply Chain Management, Transparency, and Accountability Third Party Assessment	STA-08	STA-08.1	Providers shall assure reasonable information security across their information supply chain by performing an annual review. The review shall include all partners/third-party providers upon which their information supply chain depends on.	Do you assure reasonable information security across your information supply chain by performing an annual review?	x			
		STA-08.2	Does your annual review include all partners/third-party providers upon which your information supply chain depends?			x		The application platform is hosted from a qualified CSP; there are no other suppliers within the entire chain.
Supply Chain Management, Transparency, and Accountability Third Party Audits	STA-09	STA-09.1	Third-party service providers shall demonstrate compliance with information security and confidentiality, access control, service definitions, and delivery level agreements included in third-party contracts. Third-party reports, records, and services shall undergo audit and review at least annually to	Do you mandate annual information security reviews and audits of your third party providers to ensure that all agreed upon security requirements are met?	x			
		STA-09.2	Do you have external third party services conduct vulnerability scans and periodic penetration tests on your applications and networks?		x			
Threat and Vulnerability Management	TVM-01	TVM-01.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to prevent the execution of	Do you have anti-malware programs that support or connect to your cloud service offerings installed on all of your IT infrastructure network and systems components?	x			

Antivirus / Malicious Software		TVM-01.2	malware on organizationally-owned or managed user end-point devices (i.e., issued workstations, laptops, and mobile devices) and IT infrastructure network and	Do you ensure that security threat detection systems using signatures, lists, or behavioral patterns are updated across all infrastructure components as prescribed by industry best practices?	x			
Threat and Vulnerability Management Vulnerability / Patch Management	TVM-02	TVM-02.1	Policies and procedures shall be established, and supporting processes and technical measures implemented, for timely detection of vulnerabilities within organizationally-owned or managed applications, infrastructure network and system components (e.g., network vulnerability assessment, penetration testing) to ensure the efficiency of implemented security controls. A risk-based model for prioritizing remediation of identified vulnerabilities shall be used. Changes shall be managed through a change management process for all vendor-supplied patches, configuration changes, or changes to the organization's internally developed software. Upon request, the provider informs customer (tenant) of policies and procedures and identified weaknesses especially if customer (tenant) data is used as part the service and/or customer (tenant) has some shared responsibility over implementation of control.	Do you conduct network-layer vulnerability scans regularly as prescribed by industry best practices?	x			
		TVM-02.2		Do you conduct application-layer vulnerability scans regularly as prescribed by industry best practices?	x			
		TVM-02.3		Do you conduct local operating system-layer vulnerability scans regularly as prescribed by industry best practices?	x			
		TVM-02.4		Will you make the results of vulnerability scans available to tenants at their request?		x		
		TVM-02.5		Do you have a capability to patch vulnerabilities across all of your computing devices, applications, and systems?	x			
		TVM-02.6		Do you inform customers (tenant) of policies and procedures and identified weaknesses if customer (tenant) data is used as part the service and/or customer (tenant) has some shared responsibility over implementation of control?	x			on customer's request
Threat and Vulnerability Management Mobile Code	TVM-03	TVM-03.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to prevent the execution of unauthorized mobile code, defined as software transferred between systems over a trusted or untrusted network and executed on a local system	Is mobile code authorized before its installation and use, and the code configuration checked, to ensure that the authorized mobile code operates according to a clearly defined security policy?			x	SaaS does not require a third party installable mobile service.
		TVM-03.2		Is all unauthorized mobile code prevented from executing?			x	SaaS does not require a third party installable mobile service.
